The working guidelines.

This is the applied companion to the MyWeli brandbook — the day-to-day reference for anyone building the product or its communications. The brandbook covers why; this covers how the logo, colour and type behave on a screen, and the rules that keep every one of them unmistakably MyWeli. The name says it: Weli means bien-être — well-being. MyWeli books everything that keeps life running; MyWeli Business runs the professionals behind it.

TAGLINE

Votre bien-être, réservé.

The mark — a bookmark, 180° symmetric (M = My, W = Weli).

MyWeli

The wordmark — mixed case, never spaced or all-caps.

Lockups

✓ Horizontal	default
✓ Vertical	square spaces
✓ Mark	tight / icons

Clear space

Keep a margin of x on every side — x = half the mark's height. Nothing enters that zone.

Minimum size

Mark	24 px
Wordmark	96 px
Lockup	132 px

Never

Distort · rotate · recolour · add effects · fill the shape · change the type or spacing.

Black and white, then a little function.

SECTION LABEL

Emphasis, one way.

Weight carries emphasis. Colour carries hierarchy. Never both at once, and never a decoration.

Bold, not italic

Emphasise with SemiBold. MyWeli never uses italics.

Colour for hierarchy

Ink for primary, grey for secondary — not for emphasis.

One signal at a time

Don't stack bold + colour + size on the same words.

Links are the exception

The one place for a distinct style — ink, underlined on tap.

DO

Réservé pour **samedi 15h.**

DON'T

Réservé pour **SAMEDI 15H !!**

Bold + all-caps + colour + exclamation — four signals fighting for the same three words.

Same system, different volume.

The type flexes from a loud brand moment to a quiet wall of data — without changing the fonts, the colours, or the tone of voice.

Prestation	Coupe + barbe
Durée	45 min
Prix	8 000 F
Statut	Confirmé

Flex size, weight, space and colour. Never the typefaces, never the voice.

Eight ways to break the type:

Quiet and precise.

Lots of white space, few borders, one accent action per screen. The interface should feel like the logo: calm, exact, nothing spare.

✓ Spacing

An 8-point grid; 4-point half-steps. Space is the main tool.

✓ Radius

12 px on cards and inputs; full-pill on buttons.

✓ Surfaces

White base, G100 surfaces, 1 px G300 lines. Shadows almost never.

✓ Icons

Line, single weight, round joins — family with the mark.

Card

Real people, real moments.

Warm, natural and unposed — someone mid-service or mid-life, in real Ivorian settings, lit by the light that's there. Never stock, never stiff.

Detail — hands, craft

Do

Natural light · candid · real customers · generous negative space · off-centre subject.

Don't

Posed stock · harsh flash · forced smiles · busy backgrounds · logos on top of faces.

Calm, clear, human.

Five principles for every word — in the app, an email, or on a sticker.

01 **Clear before clever**

Plain words. Specific beats witty.

02 **Calm, not hyped**

No exclamation marks, no “amazing”, no urgency tricks.

03 **Speak to a person**

Warm and human. “You”, never “the user”.

04 **Keep it short**

Cut anything that isn’t pulling weight.

05 **Stay honest**

Real prices, real times. Never overpromise.

✔ **We say**

MyWeli

Build it quietly.

When in doubt, choose the calmer, more precise option. That's usually MyWeli. Questions, assets and approvals:
