IN PRACTICE

21	Applications	24
22	Voice in context	25

How to use this book.

This is the MyWeli brandbook — the single source of truth for how the brand looks, sounds and behaves. The first half is strategy and voice: who we are and how we speak. The second half is the visual system — logo, colour and type, with the rules that keep them consistent. When something isn't covered here, choose the option that feels quietest and most precise. That's usually MyWeli. This is a living document — it grows as the brand does.

01 **Strategy**

Purpose, positioning, audience, values.

02 **Verbal identity**

How MyWeli sounds, and how we write.

03 **Visual identity**

Logo, colour, type, pattern, motion.

04 **In practice**

The brand applied, and voice in context.

Make everything effortless — to book, and to run.

MyWeli is one app to book the services that keep life running — beauty first, then health, home, sport and beyond. For the professionals behind them, MyWeli Business is the tool that runs the whole operation: bookings, clients, calendar, payments. One side saves people time; the other helps a business grow.

IN ONE LINE

Give people their time back
— and give service
businesses a way to grow.

VISION

A Côte d'Ivoire where everything you book is one tap away — and every service business can run and grow from a single app. West Africa, in time.

POSITIONING

For anyone who books services,

MyWeli is the one app to book everything

and manage every appointment in one place.

Unlike scattered calls and WhatsApp chats, it shows real availability and confirms in a tap.

Two sides, one experience.

The client

People who book services regularly — mostly urban and phone-first. Beauty today; tomorrow their doctor, their mechanic, their kid's tutor. They're tired of calls, waiting and juggling apps. They want to find it, book it, and move on.

THEY WANT

- ✓ Book anything, one place
- ✓ Save time
- ✓ No surprises

The professional — MyWeli Business

Independent professionals and small service businesses — stylists and barbers first, then clinics, trainers, tutors, repairers. They run on WhatsApp and a paper diary. MyWeli Business gives them one place to run and grow the whole operation.

THEY WANT

- ✓ More clients, less admin
- ✓ Fewer no-shows
- ✓ One tool for it all

What we believe.

01 **Effortless over everything**

Every screen, word and step earns its place. If it doesn't help you book, it goes.

02 **Trust is the product**

Real prices, real availability, real confirmations. No surprises, ever.

03 **Built for here**

Designed for how Côte d'Ivoire actually books — the phones, the networks, the habits.

04 **Quiet confidence**

We don't shout to be noticed. We earn it by working, every single time.

If MyWeli were a person...

...they'd be the friend who always knows a good spot and books it for you, no fuss. Calm, precise, warm and quietly premium. They don't oversell or overshare — they just make things easy.

Calm · Precise · Warm · Confident

WE ARE / WE AREN'T

Warm — not gushing

Confident — not loud

Simple — not basic

Premium — not exclusive

The line.

One line per context — never stacked. The name already means well-being, so the taglines carry the action.

MASTER
Client-facing

Votre bien-être, réservé.

ESSENCE
Sits with the logo

Votre bien-être.

MYWELI BUSINESS
Professional side

Plus de clients, moins de gestion.

ALTERNATES

Tout se réserve.

Réservez tout, gagnez du temps.

Tout, sur rendez-vous.

Sentence case, no exclamation. Keep the line near the logo — never locked inside the lockup.

How MyWeli sounds.

Five principles for every word we write — in the app, in an email, on a sticker.

-
- | | | |
|----|----------------------------|---|
| 01 | Clear before clever | Say what happens, in plain words. Specific beats witty, every time. |
|----|----------------------------|---|
-
- | | | |
|----|------------------------|---|
| 02 | Calm, not hyped | No exclamation marks, no “amazing”, no fake urgency. Confidence is quiet. |
|----|------------------------|---|
-
- | | | |
|----|--------------------------|---|
| 03 | Speak to a person | Warm and human. We say “you”, never “the user”. |
|----|--------------------------|---|
-
- | | | |
|----|----------------------|--|
| 04 | Keep it short | Fewer words. Cut anything that isn’t pulling its weight. |
|----|----------------------|--|
-
- | | | |
|----|--------------------|---|
| 05 | Stay honest | Real prices, real times. Never promise what we can’t deliver. |
|----|--------------------|---|
-

✓ We sound like

a calm, organised friend.

Booked — see you Saturday at 15h.

My Weli / MYWELI

Product copy is French. “MyWeli” is never translated, never spaced (MyWeli, not My Weli), never all-caps in body text. The professional side is “MyWeli Business”.

The bookmark

The mark is a bookmark — the small act of saving your place. MyWeli saves you something better: your next booking, whatever it's for.

Weli means bien-être — well-being — so the name reads as “my well-being.” The form carries it: one stroke weight, exact 180° symmetry. The top half is an M — My; rotated, the lower half is a W — Weli. One mark, two halves, the whole name.

My upper half

Weli lower half, rotated 180°

One word, two systems

The M and W are the two halves of the mark, not typed letters. The remaining y, e, l and i are set in Poppins Medium, and the mark-halves are matched to that lowercase weight so the whole word reads as a single, even unit.

Mmark — upper half

y e l iPoppins Medium

Wmark — lower half

Mixed case is the signature treatment. An all-caps cut exists for tight, technical contexts only.

Horizontal

Default. Headers, web, wide spaces.

Vertical

Square and centred contexts.

Mark

Icons, avatars, tight spaces.

Wordmark

When the mark already appears nearby.

Clear space = x on every side. x equals half the mark's height.

Give it room

Keep a margin of clear space around the logo so nothing crowds it — no text, imagery or edges inside that zone.

Minimum sizes

Mark	24 px / 8 mm
------	--------------

Wordmark	96 px / 24 mm
----------	---------------

Lockup	132 px / 34 mm
--------	----------------

actual minimum mark

The mark stays exact. A few things it must never do:

Black and white, nothing louder.

The identity is monochrome by conviction. Black on white, white on black — maximum contrast, zero noise. Silver is held in reserve for premium finishes: foil, embossing, the reflective sticker.

Ink Black
#000000

Paper White
#FFFFFF

Silver
#B9BDC1 · metallic

Colour for the interface

The brand stays black and white. These colours live only inside the product — used sparingly, for text hierarchy, surfaces, and the few moments a screen must signal a state.

Derived from the mark

A quiet, tone-on-tone field of the mark — for backgrounds, packaging and section breaks. It carries the brand without competing with it: keep contrast low, and never lay the logo over a busy area of the pattern.

Light variant — grey mark on white.

The loading mark

The mark draws itself on loop. Standard speed for splash and full-screen; a faster cut for inline spinners.

App icons

Client

Business

Iconography

UI icons follow the mark: a single stroke weight, round caps and joins, generous corners. Line, not filled; simple, not detailed. When an icon and the mark sit together, they should look family.

App — placeholder (UI in development)

Business card

Transparent sticker

Photography — salon & craft

Photography — lifestyle

A mix of built assets and space for real photography — warm, natural, people-first.

The same screen, done right and done wrong.

Why it matters

Both screens confirm the same booking. One respects the reader; the other performs at them. Calm and specific always wins.

Illustrative — left uses our voice, right breaks every principle on the previous pages.

MyWeli

A living document.

This book will grow. Propose changes, don't work around them — consistency is what makes a small brand feel big. Questions, assets and approvals:
